Electronic Gate Control Agreement

Electronic Gate Access Control #(s)	
-------------------------------------	--

- The electronic gate access controls have security seals fixed to the sides
 of the battery compartment. Should any electronic gate access control
 become compromised (battery compartment accessed) or unaccounted
 for, a security fee of \$300 will be levied upon the company to which the
 electronic gate access control was issued.
- Should the security seals begin to become compromised or an electronic gate control need to be replaced, bring either a new electronic gate control and/or a new battery along with the current electronic gate control to the Airport Security Coordinator for a replacement prior to the electronic gate access control becoming compromised.
- I have been trained and have ensured that those I authorize to use this/these electronic gate access control(s) are trained in the proper protocols in using these electronic gate access controls.
- I and/or my company are responsible for all employee/contractor actions that I authorize this/these electronic gate access control(s) for.
